The table shows two columns of code snippets. The left column, labeled 'ORIGINAL GRAPHICS PRIMITIVE SEQUENCE', contains sequences for GL_POLYGON and GL_LINE_STRIP. The right column, labeled 'OPTIMIZED GRAPHICS PRIMITIVE SEQUENCE', shows how these can be converted into GL_TRIANGLES and GL_LINES respectively. Braces on the left and right sides group specific lines of code: {952A} groups lines 958A through 958B; {962A} groups lines 960A through 966B; {952B} groups lines 956A and 956B; and {962B} groups lines 966A and 966B. Arrows point from these brace labels to their respective lines in the code. Labels 950 and 980 are positioned above the first and last rows of the table respectively.
